

## AL600 Hybrid Platform Lift

**NEW AND IMPROVED DESIGN!**  
Wires and chain now covered

Drive on, drive off platform

Easy to operate remote control

Optional wireless remote

**Lift connects to existing third row seating!**

  
MADE IN USA

The image shows the AL600 Hybrid Platform Lift in three contexts: a close-up of the top mechanism with a callout for the new design, a side view of the platform with a callout for the drive-on/off feature, and a woman in a wheelchair using the lift inside a vehicle's third row. A callout for the remote control is also present. A small American flag icon and 'MADE IN USA' text are located in the bottom left corner of the image area.

### DESCRIPTION

Harmar's AL600 combines the simplicity of a drive-on, drive-off platform with all the benefits of carrying your mobility device inside a vehicle.

With only 43" of depth and 32" of headroom required, this is **the most compact hybrid lift on the market today**. Though compact, it still manages to offer the largest travel distance in its class, making this lift compatible with most enclosed vehicles, including SUVs! Installation utilizes existing seat mounts, requiring no drilling or further vehicle modifications. To top it all off, the incredibly compact design allows the second row seating to remain in place!
