The Nitro™ Glide Knee Walker offers users recovering from a below-the-knee injury the ability to remain mobile and glide through their daily activities in an all-new sleek design. Offered in two vibrant colors, this patented design features an adjustable-width front axle providing optimized support in both indoor and outdoor terrains. The ergonomic design of the adjustable knee pad provides the necessary comfort and elevation to the injured leg while the adjustable handlebar is equipped with 8 adjustment holes. The lightweight frame safely encloses the brake cable inside to enhance its modern design and the foldable feature makes it convenient for storage and transport.
